

STRUCTURAL + CIVIL ENGINEERING CONSULTANTS

# *Engineering* that brings design to life.

Award-winning structural and civil engineering consultants for architects, developers, contractors, public bodies and homeowners.

**5** UK OFFICES

**50+** TEAM

**15,000+** PROJECTS

SERVICES OVERVIEW

# Building strong foundations for UK construction.

Structural and civil engineering support for architects, developers, contractors, public bodies and homeowners — from the first feasibility conversation through to detailed design and site delivery.

CORE SUPPORT

● **Building structures**

● **Civil infrastructure**

● **Surveys & audits**

● **MMC & self-build**

● **Pre-planning advice**

● **Drainage & SuDS**

**Talk to JMS before design risk hardens.**

**02**

STRUCTURES + SURVEYS

# Structural engineering that keeps design

Practical structural input for alterations, basements, foundations, superstructures, temporary works and structural investigations.

CORE SUPPORT

● Residential alterations

● Basement design

● Foundations

● Temporary works

● Site inspections

● Structural audits

Talk to JMS before design risk hardens.

03

CIVILS + INFRASTRUCTURE

# Civil engineering shaped around site constraints.

Drainage, SuDS, flood-risk, roads and infrastructure advice for schemes that need robust technical thinking and clear planning-stage outputs.

CORE SUPPORT

● **Drainage strategy**

● **SuDS reports**

● **Flood risk**

● **Roads & highways**

● **Infrastructure design**

● **Planning support**

**Talk to JMS before design risk hardens.**

**04**

RESIDENTIAL STRUCTURAL DESIGN

# Marlborough, London

Structural engineering for a high-value residential scheme where design intent, construction sequencing and practical detailing needed to work together.

PROJECT PROFILE

Structural design

Residential

London

Practical engineering clarity from early advice to delivery.

HERITAGE + ALTERATIONS

# Refurbishment of The Malthouse

Engineering advice for sensitive adaptation work, balancing existing fabric, new use and buildable structural interventions.

## PROJECT PROFILE

Refurbishment

Heritage

Surveys

Practical engineering clarity from early advice to delivery.

RURAL RESIDENTIAL CONVERSION

# Norfolk Hall Barns

Support for a character-led residential conversion with structural design shaped around existing materials and future use.

PROJECT PROFILE

Residential

Conversion

Structures

Practical engineering clarity from early advice to delivery.

RESIDENTIAL DEVELOPMENT

# Brightwell Barns, Suffolk

Civil and structural engineering for a development setting where drainage, access and building design needed a joined-up technical route.

PROJECT PROFILE

Civils

Structures

Suffolk

Practical engineering clarity from early advice to delivery.

COMMERCIAL ENGINEERING

# BCL, Swaffham

Practical engineering support for a commercial site, coordinating structure, drainage and construction-stage requirements.

PROJECT PROFILE

Commercial

Drainage

Design

Practical engineering clarity from early advice to delivery.

RESIDENTIAL REUSE

# Redevelopment of St Mary's Lodge

Engineering input for redevelopment work where existing conditions, design aspiration and delivery risk all needed to be resolved clearly.

PROJECT PROFILE

Redevelopment

Residential

Surveys

Practical engineering clarity from early advice to delivery.

CIVIL INFRASTRUCTURE

# Tidal Barrier, Ipswich

Civil engineering experience applied to waterside infrastructure, public-realm constraints and resilient technical delivery.

PROJECT PROFILE

Infrastructure

Civils

Ipswich

Practical engineering clarity from early advice to delivery.

URBAN DEVELOPMENT

# Peelers Yard, Manchester

Structural and civil engineering support for a dense urban scheme with coordination, sequencing and buildability at the centre.

PROJECT PROFILE

Urban

Manchester

Structures

Practical engineering clarity from early advice to delivery.

RESIDENTIAL SCHEME

# Old Wokingham Road

Residential engineering support from initial advice through to coordinated design information for delivery.

PROJECT PROFILE

Residential

Structures

Delivery

Practical engineering clarity from early advice to delivery.

INDUSTRIAL + INFRASTRUCTURE

# Port One Logistics Park

Engineering support for a logistics environment where drainage, external works and structural coordination had to perform at scale.

## PROJECT PROFILE

Industrial

Logistics

Civils

Practical engineering clarity from early advice to delivery.

RESIDENTIAL DEVELOPMENT

# Tayfen Court, Suffolk

Technical design support for a residential development requiring robust structural thinking and practical coordination.

PROJECT PROFILE

Residential

Suffolk

Design

Practical engineering clarity from early advice to delivery.

CIVIL + STRUCTURAL ENGINEERING

# Bickley Road Development

Engineering for an urban residential scheme, connecting structural design, drainage strategy and construction-stage clarity.

## PROJECT PROFILE

Civils

Structures

London

Practical engineering clarity from early advice to delivery.

MOVE FROM BROCHURE TO PROJECT ADVICE

# Find the right engineering route.

If you already know the project type, jump into the service pages. If not, contact JMS and the team can point you towards the right structural or civil engineering support.
